Zero-X ZXP-DR4 - Setting up your drone

Modified on: Tue, 8 Jul, 2025 at 1:15 PM

Installing the battery:

1. Ensure that the battery is fully charged.
2. Insert the battery into the middle of the Drone in the right direction.
3. Slide the battery all the way in, until it securely slots into place

Installing a Micro-SD card:

The Micro SD Card slot is at the bottom left side of the Drone.

1. Turn the drone upside down and then, with the correct orientation, insert the SD card into the slot gently until you hear a click

Unfolding the drone:

1. Bring out the arms of the drone to prepare its flight
2. These arms can be folded back in once you are done flying for compact storage

Prepare remote control:

1. Put two fully charged AA batteries into the remote control
2. Pull out the arms of the remote controller

Settings up the Zero-X Volanz app:

1. Go into you Apple app store or Google play store and search for "Zero-X Evolved 4K", and install the app
2. Connect the app and then go into your smartphone Wi-Fi settings and select your drone's internet connect.
3. Once connected, open the app.
4. If successfully paired, you should be able to view live feed and take control of your drone and its camera from your phone.

Pairing your remote control and drone:

1. Hold down the lock button and swipe the power ON button to the right to turn on the controller
2. On your drone, press down the button on the top of the battery for at least 3 seconds and wait for the drone to make a sound and activate 4 lights in sequence
3. The remote should beep twice to confirm a successful pair. This should be indicated by the controller LCD screen displaying drone stats such as battery life.
